

# Doubles Race to 100

This is a two-player game to reinforce counting or skip-counting. It is ideal as a math warm-up to get kids excited about math, regardless of age!

**Object:** to be the first to write all of the numbers from 1-100

**Materials:** two dice, 1 pencil, a piece of paper for each player

Players take turns rolling the dice. Once one player rolls a set of doubles, she takes the pen and begins writing the numbers from 1-100 on her paper.

As she is writing, the other player rolls the dice, trying to roll doubles. As soon as he rolls doubles, he calls out, "Doubles!" and takes the pen. He begins writing the numbers from 1-100.

As he is writing, Player 1 keeps rolling. Once she gets doubles again, she begins writing from where she left off, trying to get all the way to 100.

Play continues until one player reaches 100.

## MODIFICATIONS

This game is easy to modify in order to reinforce a variety of skills! Some ideas include:

- Use a 100 chart or 120 chart for students to write their numbers on.
- Have students count backwards from 100-1.
- Have students skip count forwards or backwards. For example, skip-count by 5's from 0-500.
