# KNOCK OFF THE CLOCK 

## Materials:

- two dice
- scrap paper and pencil

## Objective:

Eliminate all the numbers on your clock as quickly as possible (or, if playing with two players, before your opponent).

## Instructions:

- Draw a clock face on your scrap paper.
- Roll two dice and use them to make an equation.

For example, if you roll a 4 and a 3 , you could add them to make 7 , subtract them to make 1 , or multiply them to make 12 . Write one equation beside the clock, and cross off the clock number that you eliminated (the answer to your equation).

- Keep rolling until you've eliminated all the numbers on your clock.
